SWEDISH RELAXATION

AROMATHERAPY

The sensorially elating effects of this bespoke massage are enhanced by the use of natural essential oils, extracted from plants and flowers. Your therapist will choose a bespoke aroma which best suits your needs and preferences from a selection of relaxing, energising and harmonising aromas. When inhaled, the scent molecules in essential oils travel from the olfactory nerves directly to the brain and especially impact the limbic system. This treatment is not recommended during pregnancy or breastfeeding.

Shiatsu is a Japanese form of bodywork. Pressure is applied to all parts of the body along your meridians using palms, fingers and elbows. This technique stimulates the natural healing powers of your body.

BAMBOO MASSAGE

Bamboo sticks are used for this firm massage, being held and maneuvered by the therapist and rolled over your muscles with the same pattern of strokes which are used by hands in a deep tissue massage treatment. The muscles are then kneaded, which assists in the release of tension and easing of knots.
